

SELECTED BIBLIOGRAPHY ON UNGULATES OF INDIA

S. Agarwal, S. Uniyal and M.S. Rana

INTRODUCTION

A large volume of scientific information on ungulates is widely scattered in India. It would be difficult and critical to access appropriate and relevant literature on the subject due to in absence of proper documentation. This compilation is the first of its kind to collate the existing published information on *Ungulates of India* and contains **1101** references that are largely in English language. This bibliography covers almost 139 years (between 1867 and 2005) of publications.

The following secondary sources have been consulted during the compilation of this bibliography:

- a) International Database. Wildlife and Ecology Studies CD-ROM (Period 1935 – 2005).
- b) WII Library and Documentation Centre in-house Databases.
 - i) Reprint Database.
 - ii) Book Database.
 - iii) WILD Database (Indexing and Abstracting Database of Indian Wildlife).
 - iv) MPBIB Database (Bibliography on Wildlife and Protected Area Management in Madhya Pradesh).
 - v) Indian Mammal Research Bibliographic Database. (Developed by Dr. M.S. Rana for Scientometric Study of Indian Mammals literature). To make bibliography more user friendly, the bibliography has been supplemented with four indices for easy access to the citations.

- a) The **Author index**
- b) The **Subject index**
- c) The **Species index**, and
- d) The **Publication year index**

Each article in the bibliography has been analysed on the basis of 14 broad subject heading as shown in Table 1. Among these, **Behaviour** followed by **Conservation and Management**, **Natural History** and **Morphology** dominate the database.

Table 1. Subject Distribution

Sl. No.	Name of Subject	No. of References
1	Behaviour	245
2	Conservation and management	238
3	Natural History	131
4	Morphology	118
5	Distribution	94
6	Status	89
7	Wildlife Health	72
8	Population Studies	64
9	Captivity	53
10	Habitat	36
11	Reproduction	16
12	Ecology	14
13	Wildlife trade	6
14	Taxonomy	4

Further analysis of database showed that the ungulate species like *Antilope cervicapra*, *Rhinceros unicornis*, *Axis axis* and *Cervus unicolor* have been mostly studied in India. Table 2 presents the distribution of literature of the species in-term of number of references available in the bibliography.

Table 2. Distribution of literature on species of ungulates in India

Sl. No.	Name of species	No. of references
1	<i>Antilope cervicapra</i>	161
2	<i>Rhinoceros unicornis</i>	141
3	<i>Axis axis</i>	137
4	<i>Cervus unicolor</i>	130
5	<i>Bos gaurus</i>	96
6	<i>Cervus duvauceli</i>	78
7	<i>Boselaphus tragocamelus</i>	74
8	<i>Bubalus bubalis</i>	61
9	<i>Gazella gazella</i>	58
10	<i>Hemitragus hylocrius</i>	52
11	<i>Cervus eldi</i>	40
12	<i>Muntiacus muntjac</i>	31
13	<i>Sus scrofa</i>	29
14	<i>Axis porcinus</i>	25
15	<i>Tetracerus quadricornis</i>	24
16	<i>Equus hemionus</i>	18
17	<i>Tragulus meminna</i>	11
18	<i>Sus salvanius</i>	10

Over 861 authors have been indexed in the present bibliography and their contribution in-term of number of publication ranged from 1 to 21. The leading authors who contributed = 10 articles were: A.J.†. Johnsingh, A.R. Rahmani, C.G. Rice, H.S. Panwar, E.P. Gee, E.R.C. Davidar, K. Sankar, K.U. Karanth, L.N. Acharjyo, P.C. Kotwal, R. Gopal, R.C. Morris and R.K. Pandey.

Further analysis of the database showed that 745 out of 1101 references have been contributed individually, as shown in Table 3. Other 314 references were found to be contributed in collaboration.

Table 3. Authorship pattern

Sl. No.	Authorship pattern	No. of references
1	Single	745
2	Two	199
3	Three	62
4	Four	41
5	Five	6
6	Six	3
7	Seven	1
8	Eight	1
9	Ten	1
10	Annon	42
Total		1101

The trends in the chronological development of literature has been shown in Table 4. The number of publications in a year ranged 0-52 with the year 1991 recording the maximum publications (052).

Table 4. Chronological Development of literature

Sl. No.	Period	No. of articles
1	1867-1899	35
2	1901-1910	37
3	1911-1920	45
4	1921-1930	63
5	1931-1940	53
6	1941-1950	34
7	1951-1960	52
8	1961-1970	48
9	1971-1980	105
10	1981-1990	245
11	1991-2000	312

12	2001-2005	57
13	Undated and in press	15
	Total	1101

The above table also revealed that 614 (>55 %) references have been published from 1981 to 2005.

For the convenience of the user, this bibliography is also available in database form at the Wildlife Institute of India, Library and Documentation Centre. It is hoped that providing information both in traditional printed form as well as through machine readable database will be very useful and act as a ready reference to both professional and amateur wildlife ecologists and protected area managers, interested in the ungulates of India. We would also like to add that this database is not complete. While all possible efforts have been made to cite the references as accurately as possible, it is probable that some mistakes have remained, largely owing to the compilation of the majority of references from secondary sources. We would be grateful if such mistakes are brought to our notice for correction and continuous updation of this database.
