Introduction

A large volume of scientific information on Galliformes of India is available but widely scattered. Proper literature documentation is important to easily access appropriate and relevant literature on a given subject. Therefore, a detailed literature survey was carried out on galliformes of India. We could compile 728 references that are in English language. This bibliography covers a time period of 160 years of time period (1848-2007).

The following secondary sources were consulted during the compilation of this bibliography:

- a) International Database
Wildlife and Ecology Studies CD-ROM (Period 1935 – 2007)
- b) WII Library and Documentation Centre in-house Databases
 - i) Reprint Database
 - ii) Book Database

WILD Database (Indexing and Abstracting Database of Indian Wildlife)

To make bibliography more user friendly, the bibliography has been supplemented with three indices for easy access to the citations.

- a) The Author index
- b) The Subject Index
- c) The Publication Year index

Each paper/ article in the bibliography has been categorised on the basis of 14 broad subjects as shown in Table 1. Among these 'Status/distribution' followed by 'Conservation and Management', 'Behaviour' and 'Breeding' dominate the database.

Table 1 : Distribution of Bibliography in Broad Subject Areas

S.No.	Subject Area	No. of References
1	Status/Distribution	361
2	Conservation & Management	118
3	Behaviour	103
4	Breeding	68
5	Habitat	56
6	Natural History	27
7	Captivity	17
8	Taxonomy	16
9	Population Studies	16
10	Techniques/Tools/Analysis	14
11	Wildlife Trade	11
12	Morphology	7
13	Wildlife Health	7
14	Miscellaneous	11

Over 333 authors have been indexed in the present bibliography and their contribution in terms of number of publications ranged from 1 to 64. Further analysis of the database showed that 438 out of 728 references have been contributed by one author as shown in the Table 2. The remaining 290 references were contributed in collaboration by two or more authors.

Table 2 : Authorship pattern observed in the Bibliography

S.No.	Authorship Pattern	No. of References
1	Single	438
2	Two	147
3	Three	83
4	Four	29
5	Five	6
6	Six	4
7	Eight	1
8	Corporate Authors	11
9	Anonymous	9
	Total	728

The trends in the chronological development of literature are presented in Table 3. The number of publications in a year ranged 0-48 with the years 1997 and 2000 recording the maximum publications (48). The International Galliformes Symposium were held during 1997 (Malaysia), and 2000 (Nepal). About 438 references (60%) on Galliformes were published during the period 1991-2007.

Table 3 : Chronological Development of literature

S.No.	Period	No. of References
1	1848-1900	29
2	1901-1910	14
3	1911-1920	26
4	1921-1930	11
5	1931-1940	20
6	1941-1950	12
7	1951-1960	12
8	1961-1970	31
9	1971-1980	48
10	1981-1990	87
11	1991-2000	295
12	2001-2007	143
	Total	728

For the convenience of the user, this bibliography is also available in database form at the Library and Documentation Centre, Wildlife Institute of India. This bibliography shall be provided in printed form as well as through machine readable database to users. This database will be useful and act as a ready reference to both professional and amateur wildlife ecologists, and protected area managers, interested in the Galliformes of India. Though we tried our level best to consult as much literature as possible, we still believe that this database may be incomplete. A few reference numbers have been left blank (indicated by --*) as the study area limits within India has not been mentioned. While all possible efforts have been made to cite the references as accurately as possible, it is probable that some mistakes have remained, largely owing to the compilation of the majority of references from secondary sources. We would be grateful if such mistakes are brought to our notice for correction and continuous updation of this database.
